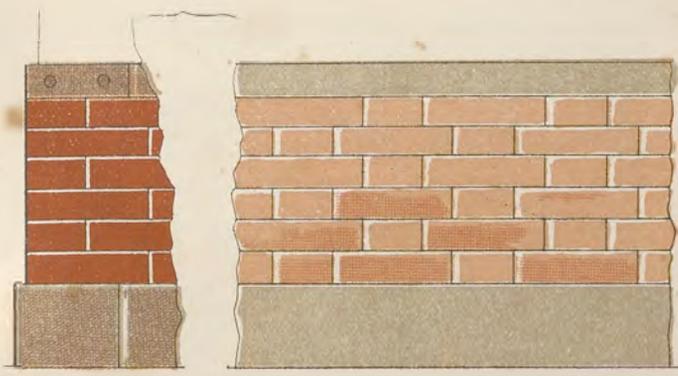

FIG. 1.

CAMINO PER CASA COLONICA

Prospetto

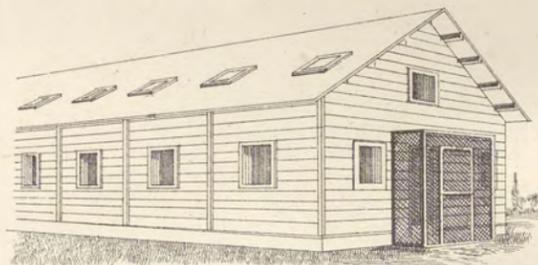

a, recipiente per la provvista di acqua calda in ferro stagnato con coperchio; b, fornello a legna; c, fornello a carbone n. 6. Le canne di questi fornelli immettono nella capra I del camino al disopra del ventilatore h; d, lasra di ghisa in cemento a ribalta che preserva il recipiente dell'acqua calda e forma parte del fondo del camino; e, imbuto terminale del tubo per cui si carica il recipiente a di acqua fredda; f, robinetto terminale del tubo pel quale si può cavare l'acqua calda del recipiente a, n. 6; questi due tubi sono congiunti a due mezzoni corrispondenti fissi sul recipiente a per mezzo di manicotti a doppia vite; questi due tubi possono essere anche esteriori o situati in due tracce nel muro aperte; g, stufa che può dirvente fornno sostituendo alla porzione centrale (sotto al fuoco) della soglia una lasra di ghisa di buon spessore; h, calorifero che può riscaldare l'ambiente contiguo (dormitorio per gli avventizi); le valvole r' r'' permettono il moto dell'aria nel senso delle frecce, ma si chiudono se si manifestasse una corrente contraria. Il tubo h' riscalda per irradiazione la cucina; la valvola r''' permette di far agire o no il calorifero; l, canna; m, nicchia; n, maniglia per pezzi da asciugare o da affumicare; o credenza a muro; r, doccia; s, filo di ferro tirato fra i pilastri per appendervi temporaneamente arredi da cucina; k, tavolotta di legno a ribalta invernata a fermo che si ribalta quando il camino fa fumo specialmente durante l'avviamento del fuoco; essa restringe la bocca dall'alto in basso.

Fianco del camino e sezione del fornello b

PIANTA DEL TERRANEO DELL' ENOPOLIO MUZIA CASTELLAMARE ADRIATICO

Sezione orizzontale a diversa altezza

- 1 Ingresso alla Piattaforma
- P Piattaforma
 - b pesa.
 - a cassa dell'ascensore.
 - c cassa della scala a chiocciola.
 - p pompa aspirante o premente.
 - oo chiusini delle botti sotterranee in muratura impermeabile.
 - f fontanini per lavaggi.
- T Sale dei torchi
 - ttt riparti per ciascun torchio e relativi meccanismi
 - u riparto per tubi di lavaggio.
 - z pozzetto di raccolta per rifiuti liquidi.
- U Sale dei controlli di registrazione e di spedizione
 - z pozzetto di raccolta dei rifiuti liquidi.
 - e scaffale per la conservazione dei registri.
 - ll scansie pel deposito temporaneo di fiaschi e bottiglie.
- C Cantina di elaborazione con 3 grandi serbatoi in muratura rivestiti di vetro
 - s ingresso riservato alla cantina in corrispondenza di tutte le altre porte sull'asse, e scala pel piano superiore.
 - T serbatoi o tini.
 - n n scalette di accesso al cocchiere dei serbatoi.
 - mm canaletto di scolo verso il pozzetto di allacciamento
- C' Altra cantina di elaborazione con serbatoi, idem
 - T serbatoi della capacita di Ett. 140 ciascuno.
 - C' C' corsia libera per botti di travaso e conserva.
 - r r bocchette a rubinetto per presa d'acqua in carica.
 - z pozzetto di allacciamento di tutti i rifiuti liquidi.
- C Cantina di conservazione con 4 batterie di botti
 - g gru pel sollevamento dei vasi vinari.
 - x pozzetto di allacciamento.
 - oo botti sotterranee in muratura impermeabile

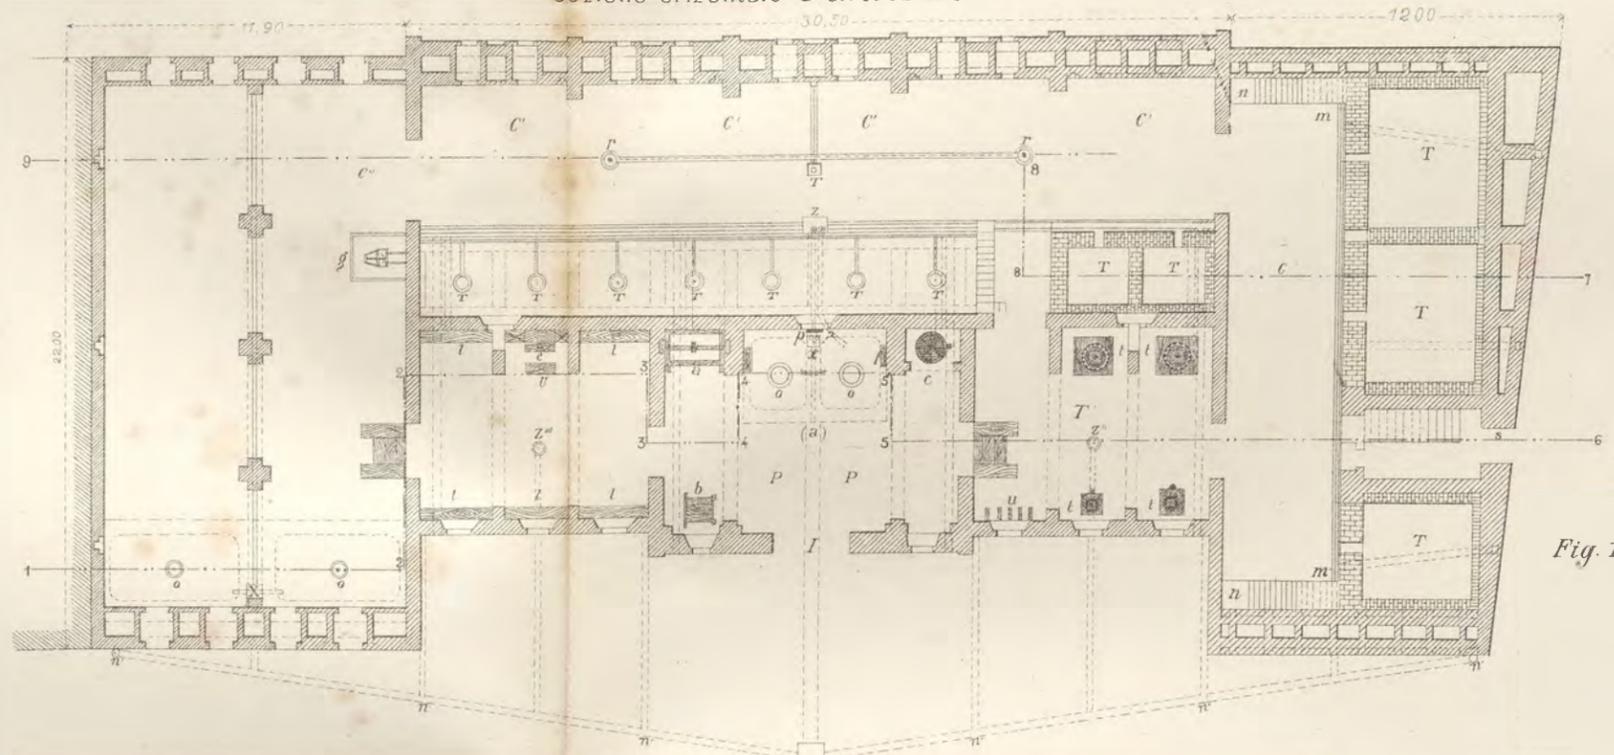

Fig. 1

Leggenda della fig. 2

- D Piano di scarico e distribuzione delle uve, dormitorio nel tempo della vendemmia
 - a cassa dell'ascensore ed argano di sicurezza.
 - c sbocco della chiocciola.
- E grande salone per cernita, prosciugamento ed appassimento e pigiatura delle uve e per uso rimiaia con tini in legno.
 - m' m' bocchette di immissione dei prodotti pigiati
 - m' m' bocchette di ventilazione.
 - v, v accumulatori di acqua potabile.
 - o, o canne dei camini di tiraggio.
 - t tubulatura di carico e scarico.
- F Terrazze scoperte per prosciugamenti e depositi temporanei.
- G Salone per il prosciugamento e l'appassimento delle uve, che può servire anche per prosciugare le casse sgombr.
- G' Sala per invecchiamento e imbottigliamento
 - b botola con gru e saliscendi.
 - d sala per l'enologo.
 - e « per il cantiniere.
 - f, g, h, i stanze di abitazione per quest'ultimo
 - m' bocchette di aerazione.
